**Commercial Model Name**

Product Name : REDSTER Q9.8 REVOSHOCK S + X 12 GW

**THE ONE-SKI SOLUTION FOR ALL PISTE CONDITIONS**

The Atomic Redster Q9.8 Revoshock S combines top-tier build characteristics with World Cup proven tech to create the ultimate ski for the changing conditions of all-day on-piste skiing. Revoshock S keeps the ski stable, deflecting chatter and boosting out of the turns. Designed for advanced to expert skiers who aren't interested in limitations, the Redster Q9.8 Revoshock S features the widest waist width of any ski in the Q line at 85mm and pairs it with Multi Radius Sidecut. So every turn is powerful and snappy, whether it's GS arcs down a freshly groomed bowl or quick, variable turns through the bumps and chop of late afternoon. Ultrawall sidewalls keep turns locked in with knife-like edge hold, while the Power Woodcore works with Revoshock S, and the TI Powered Titanal layer to create a ski with unparalleled handling at any speed, all day, in any conditions on the groomers.

**Revoshock S**

Revoshock S turns unwanted shocks into confidence-building stability and unparalleled acceleration.

**All-Condition Piste Shape**

Multi Radius Sidecut and extra width underfoot for stability and confidence-inspiring handling.

**Power Woodcore**

A dynamic ash and poplar core that adds a ton of stability and dampens vibrations at speed.

**Model Data**

- Family/Range : Piste
- Category/BU perimeter : Redster
- MSRP EMEA € : 1199.99
